About Me

I am a full stack web developer with over 8 years of experience. I am proficient in a variety of web technologies, including React, Typescript / Javascript, MySQL, GraphQL, HTML, CSS and more. I prefer to focus efforts on results based development, rather than what "feels" right. I love to learn new technologies and believe highly in continuing education.

I know that there are often many ways to achieve a desired outcome and am always looking for new and innovative ways to improve the users' experience. I am passionate about creating websites that are accessible to everyone, regardless of their ability. I am also committed to optimizing for search engines and page load speeds.

Skills

React JS, Next JS, GraphQL, TypeScript, JavaScript, Shopify / Liquid, Sass / SCSS, UX / UI, MySQL, Node JS, Express JS, JSON, REST, HTML 5, CSS 3, Azure DevOps, Styled Components, SPAs, Responsive Web Development, GitHub, VTEX, Sitecore, Salesforce / Heroku and Adobe Suite.
